UNITED NATIONS SUSTAINABLE DEVELOPMENT GOALS

Funding of Community Enterprises such as Shrimp Paste Manufacturing, Chicken & Egg Farms, Boat Building, Community Farms, Handicrafts Production & Marketing.

Direct Employment such as Field Patrols, Fire Brigade, Forest Guides, Boat Captains

Horticulture Training through World Education. Funding of Community Enterprises and Direct Employment listed in SDG #1

Medical Services including immunizations and the construction and management of a Floating Clinic, providing medical care access to remote villages

Educational Funding for a Scholarship Fund, Technology and Solar Lighting for School Houses

Community Enterprise Funding is directed specifically at empowering women and creating Women's CoOps.

6 CLEAN WATER AND SANITATION

Every household in every village has been provided with access to Clean Water Systems

7 AFFORDABLE AND CLEAN ENERGY

Every household in every village has been provided with a Solar Light & Electrical System,

8 DECENT WORK AND ECONOMIC GROWTH

Funding of Community Enterprises & Direct Employment as detailed in SDG #1

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

Capacity Building for Agriculture and Aquaculture knowledge transfer, Solar Electricity to all off-grid communities, Funding of Community Enterprises.

10 REDUCED INEQUALITIES

Mandatory Inclusivity of Women in Decision Making Process and all meetings between the Project Developer and the Community Leaders. Community Enterprises targeted specifically to empower women.

11 SUSTAINABLE CITIES AND COMMUNITIES

Development of alternative, sustainable income streams, away from an historical economy of illegal logging, slash & burn shifting horticulture Results based compensation for forest conservation.

12 RESPONSIBLE CONSUMPTION AND PRODUCTION

Incentive programs to return to local food production rather than barter imported packaged foods in exchange for illegal forest timber products. Promotion of an income generating recycle bank program

13 CLIMATE ACTION

The project successfully avoided and continues to avoid the conversion of 64,500 hectares of carbon dense, high conservation value peat forests to oil palm, thereby preventing >130 million tonnes of carbon emissions

14 LIFE BELOW WATER

Nearly 100% of the project's 64,500 hectares is a wetlands reserve, conservation of which protects some 64 billion liters of water flow per month and maintains a vital fish nursery area for the Seruyan River basin

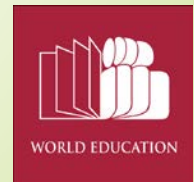

15 LIFE ON LAND

The project constitutes 64,500 hectares of lowland peat swamp forests, one of the world's most highly endangered ecosystems. It is also the world's largest privately funded orangutan sanctuary and conserves vital habitat for more than 100 RED Listed Threatened and Endangered Species.

The project works closely with the National Park Service, the Ministry of Forestry, the Forestry Service and assists communities in interfacing with government development agencies at the regional and national level.

The project has partnered with the Orangutan Foundation International, World Education, and local, provincial and national government in order to create a sustainable foundation achievement of these goals.
